

# BETHANY SCIENCE CLUB

## “OUTTA THIS WORLD!”

### ROCKETS AND SPACE

Don't miss the excitement as we study the planets by creating edible solar systems and designing constellation stargazers. We'll also discover where the moon's glow comes from, experiment with comets and learn the principles of rocketry. Each student will be making and launching their own water bottle rockets on the last day of class. *Please have your student bring an empty 2 liter bottle on the 1<sup>st</sup> day.*

**PLEASE ENROLL MY CHILD IN THIS AFTER SCHOOL SCIENCE CLUB. I HAVE INCLUDED \$50**
