

# BETHANY SCIENCE CLUB MAGNETIC MADNESS!

Let's investigate the powers of magnets! Magnets provide a creative, hands-on method for students of all ages to explore scientific concepts. Have you ever wondered why magnets pick up some objects and not others? Learn the secret of the levitating magnet and its invisible force to magically move objects with an electromagnet. Students will engineer magnetic slime and explore magnetic mazes while investigating various design and building challenges. Join the fun as we investigate the mysteries of this invisible force!
